• L-keys for hexagonal socket screws

- Hex-Plus allows socket head screws to live longer
- L-keys are quickly to hand thanks to their size markings
- · Wear-resistant size marking
- Wear-resistant clip material for enhanced durability

L-keys with plastic sleeve (SPKL) made of circular, easy-grip material. The sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. The wear-free material of the clip guarantees easy removal and a secure hold of the L-keys. For hexagonal socket screws.

#### L-Keys for Hexagon Socket Screws

# L-keys with a thermoplastic sleeve

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

### **Hex-Plus**

Hexagon screws can endure a problem because the contact surfaces delivering the power from conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

#### Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

#### Take it easy tool finder system

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in

the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

Take it easy tool finder system—with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).

#### Secure hold and easy removal

The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.
