

**826 T Kraftform Turbo bit-holding screwdriver handle with Rapidaptor quick-release chuck, 1/4" x 146 mm**  
**Kraftform Kompakt Turbo**

<b>EAN:</b>	4013288214591	<b>Size:</b>	150x60x45 mm
<b>Part number:</b>	05057480001	<b>Weight:</b>	230 g
<b>Article number:</b>	826 T Kraftform Turbo	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	84661038

- 4 times the screwdriving speed thanks to the turbo function (purely mechanical - without battery)
- Activate and deactivate the turbo function by a simple push of a button
- Turbo function especially for smooth couplings
- Can be used without the turbo function like a normal screwdriver for couplings with steadily increasing torque, e.g. for screw connections in wood
- Robust, maintenance-free gear made of steel

Many users would like to be able to carry out screwdriving processes faster without compromise. With a screwdriver that is precise, allows powerful screwdriving, and is much faster than a conventional screwdriver. A part-time universal gear is the solution: Integrated in the screwdriver handle, it quadruples the working speed with smooth couplings - purely mechanically. One hand holds the front part of the handle, the other hand turns the rear part of the handle. The turbo function can be switched on or off at the push of a button. Turning it off is recommended for tightening and loosening with high torque, e.g. for screw connections in wood, as well as for fine adjustments. Robust, maintenance-free gear made of steel with a maximum torque of 14Nm when the turbo function is deactivated. Thanks to the Rapidaptor bit holder, the Kraftform Turbo can be used with all conventional 1/4" hexagon bits for a wide variety of screw profiles. With the Rapidaptor function the bits can be inserted directly and can be easily removed by pushing the sleeve forward.

**Faster screwdriving**

The construction of the Kraftform Turbo allows the speed of manual screwdriving to be quadrupled, especially for smooth couplings - without electricity!

**With and without Turbo**

The turbo function can be activated as needed by pressing a button. Turning it off is recommended for tightening and loosening with high torque, e.g. for screw connections in wood as well as for fine adjustments.

**Robust, maintenance-free gear made of steel**

The robust steel design is maintenance-free and ensures a long product life.

**Handle/interchangeable blade system**

Thanks to the Rapidaptor bit holder, the Kraftform Turbo can be used with all conventional 1/4" bits.

**Rapid-in and self-lock**

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

**Rapid-out**

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

**Chuck-all**

The Rapidaptor quick-release chucks hold 1/4" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.
